About Us

For about 30 years, Invento is synonymous with imaginative fun and leisure activities, for a liveable world, for young and old, indoors and outdoors. As an antipole to an increasingly hectic everyday life, people today are looking for leisure activities that focus on fun, relaxation and deceleration. Invento is prepared for these expectations and shapes the leisure time of young and old in many ways and with an exceptional product range. Kites, windspinners, toys - the Invento range includes exceptional, innovative and high-quality products that have a touch of something special. With our products, we improve people's well-being to better meet the ever-increasing challenges of everyday life.

„HQ“ - Created For Fun, Engineered To Last:

With our „HQ“ umbrella brand, we hold a leading position worldwide in the markets for Kites and Windspinners. Due to high quality standards, good customer service, a versatile product range and the development of products by our own German team, Invento differs from its competitors and creates a lasting confidence in the performance of our products.

Toys - „Invento just play“ and brands from all over the world:

Our own toy ranges under the umbrella brand „Invento just play“ stand for extraordinary playing experiences and high quality standards. With a passion for products beyond the ordinary, we complement our own product lines with a variety of well-known brands from all around the world. Let us take you on a discovery trip through our exciting catalogues.

The Invento B2B Webshop: Fast, practical and super easy!

Place your future orders quite comfortably in our webshop on www.invento-hq.com, which is exclusively addressed to retailers - work faster, easier and more convenient.

Our B2B webshop offers you numerous advantages:

- **Optimum of convenience:** Boot PC – log into the webshop – place your order!
- Web shop orders will be given **top priority – acceleration** of order processing!
- **Place orders at any time suitable for you** – 24 hours a day, 7 days a week and 365 days a year!
- Inventory information in real-time
- **Most recent information** regarding special offers, novelties, best-selling items and discontinued products
- Multimedia product information (e.g. videos)
- Download of product images
- Search, select and order quickly
- Compose individual **digital reminders** (time savings in follow-up orders)
- Availability information in the shopping cart
- **Increased transparency:** Order history for current and completed orders, backorder information

Register now and enjoy special advantages!

To access our webshop, you simply need your email address and password!

2 simple steps to request your password:

- 1) Please provide us with your shop email address:
Tel: +49 (0) 4402 9262-0 or
Fax: +49 (0) 4402 9262-29 or
Email: service@invento-hq.com
- 2) **After your email address has been stored**, click on the “Forget password/request” button on the screen. Enter your email address and zip code and we will send you the login password by email.

However, you can also request your password in person. We gladly will inform you about your password on the phone or by email.

If you are not yet our customer, we will be pleased to register you as a new customer.

For security reasons, we recommend that you change your temporary password during your first order (password can only be changed when making a purchase).

Spare parts and repair service for HQ kites

With a kite from HQ, consumers rely on the highest quality in kite sports. Nevertheless, under harsh operating conditions, damage can occur or parts can be lost through inattentiveness.

For this reason, Invento offers dealers and end users a comprehensive spare parts and repair service if something breaks or the question arises whether a repair is worthwhile.

Should you have any questions with respect to spare parts or repair service, do not hesitate to contact us. Many spare parts can be ordered directly from the online store. We handle the shipping of replacement parts or the repair of an HQ kite by qualified specialists as quickly as possible.

Children's kites, bigger single-line kites or stunt kites from HQ - always the perfect choice.

Invento Customer Services + Nature Protection

For us, service means more than just the timely delivery of goods at a reasonable price. We offer our customers a variety of helpful services:

Invento B2B Webshop

See catalogue page 4 for detailed information about the Invento B2B Webshop.

HQ Sport Kite Support

In the support area of our B2B webshop on www.invento-hq.com you will find technical data sheets for many HQ Sport Kites.

Subscription to Invento Newsletter

After the entry into force of the new EU General Data Protection Regulation, customers and prospects receive our newsletter only if they have explicitly consented to receive the Invento newsletter. So many customers no longer receive our newsletter without knowing it.

You always want to be well informed? You are interested in the Invento newsletter?

Then

- contact us directly and share your wish with us or
- go to the dealer login on www.invento-hq.com and log in.

Click on the newsletter link on the appearing account page. This link opens an email that you please send us. You automatically receive a second email from us with the confirmation of your subscription.

From now on you will receive the Invento newsletter.

YouTube, Facebook And Instagram

Visit our pages on various social media platforms for up-to-date information, pictures and videos:

Picture And Video Download

In the service area of our B2B webshop on www.invento-hq.com you will find our download offerings for product and lifestyle images and many videos.

Make use of this free service and boost your own sales.

Partner of the NABU

As a partner of NABU, we provide living space for animals on our company property. With this project we want to make an active contribution to protecting diversity and maintaining our natural environment. NABU volunteers manage and maintain this „ark“ in close cooperation with Invento.

Pocket Sleds

Our Pocket Sleds are durable and reliable kites for young fliers. Constructed without a rigid frame these soft and safe kites require no further assembly. With no frame to break, the fun flying Pocket Sled fits into a little zipper backpack, complete with a key ring for easy attachment to your pants or keys. The Pocket Sled comes ready to fly with line and a handle for small hands.

Parafoil Easy + Octopus Parafoils

With no frames to break and an impressive fringe tail, our Parafoil Easy kites fly completely reliable in an extra-large wind window. These soft and safe kites require no further assembly and are perfect for travellers or an adventure filled trip to the neighborhood park. Parafoil Easy kites come ready to fly with line and spool in cool kite bags with striking graphics.

Our brightly coloured Octopus kites draw the attention of bystanders to their tentacles which gracefully float through the air. All Octopus kites come ready to fly with line and spool.

Deltas XL + Manta Kite

Larger kites are more often easier to fly than small ones. This is especially true with our collection of XL Delta Kites, filling more sky for a great display as they also prove to be perfect flying machines. They will also accommodate 'line laundry', windsocks and more tails for an even greater visual impact.

The Manta Kite is an impressive light wind flyer, additionally embellished by a long and magnificent tail.

KAP Foils

Kite aerial photography (KAP) is photography generated by lifting a camera into the sky through use of a kite. The camera is triggered either remotely or automatically to take aerial shot and can be attached directly to the kite, but is usually secured to an adjustable rig suspended from the kite line. With this elevated view, pilots can capture landscapes, objects, architecture, and people in entirely new ways. The beginning of KAP dates back to the late 19th century. Aerial photography from kites is, in fact, one of the oldest forms of remote sensing of the Earth's surface.

The KAP Foils developed by German kite enthusiast Ralf Beutnagel are reliable and very stable lifter kites for a camera rig. They have been used successfully since 2006 and have impressed many Kite Aerial Photographers by their flight characteristics. The wind range of the KAP Foil is fairly wide. These kites perform very well even in ground winds. Even KAP Foil 8.0 is more than sufficient to carry heavier cameras in light winds. In stronger winds, all KAP Foils fly very stable without slipping sideways.

KAP Foils generate considerable pull. For experienced pilots only. Strict observation of mentioned age and wind range is highly recommended.

Fringe tail included!

🏠 1.5-4 Bft. (6-28 km/h | 4-18 mph), 👤 14+

With its impressive 9-meter-long tail, "Hoffmann's Canard Delta" makes for an impressive appearance in the sky. The canard sail, used in a Delta for the first time, gives „Hoffmann's Canard Delta“ a smooth and balanced flight behaviour. This amazing single-line kite has a modified attachment of the flying line to the keel that allows a quick adjustment to changing wind conditions.

Hoffmann Collection

Born in 1964, Rainer Hoffmann discovered his addiction to Kiteflying during 1986 in St. Peter Ording. After building his

first "regular" kites he quickly proceeded with his own unique designs. He finished 1st place several times during the German Championships since 1997 and already published his own assembly manuals. All kites of Rainer Hoffmann truly convince through tremendous creativity and beautiful designs.

Hargrave Box Kite Rainbow Mesh
Art. Nr. 106372

↔ 100 cm, ↑ 100 cm, ▨ Ripstop-Polyester,
✂ 3 + 4 + 6 mm fiberglass, ⤵ Polyester 70 kp, 60 m on spool, incl. 🏴 2-5 Bft. (6-38 km/h | 4-24 mph), 👤 14+

The Hargrave Box Kite Rainbow Mesh by HQ is a contemporary tribute to the timeless Hargrave Box, originally designed by the renowned Australian inventor, Lawrence Hargrave, a visionary in the field of aviation. Hargrave's innovations greatly advanced our understanding of kites, serving as precursors to modern aircraft. HQ's interpretation of the Hargrave Box Kite delivers exceptional stability and balance when soaring through medium-strength winds, offering surprisingly robust lift. It's important to note that this kite is best suited for moderate conditions and should not be flown in storms or wind speeds exceeding 5 Beaufort (Bft).

Our funny Bouncing Buddies and Bouncing Birdeez are fun and will draw attention as beach and lawn decoration.

HQ SPORTKITES – 30 YEARS OF GLOBAL KITE COMPETENCE!

With 30 years of experience in the development and production of innovative sport kites, the „HQ Sportkites“ brand has a large community of fans worldwide.

Every year, we invest considerable funds in our development work. Our stunt kite models are developed at our site in Rastede/Germany by a highly motivated and competent team that uses lots of practical know-how in the design of new models.

We work according to strict quality standards. Our models are produced with high-quality space-age components and offer best performance and a fair price-performance ratio for dealers and end consumers in their respective classes.

HIGH-TECH FABRIC FOR OUR KITE SAILS

The decisive quality features for a high-quality kite fabric are light weight, tear-resistance and a resilient coating.

Ripstop-Polyester and Nylon

Ripstop means fabrics that have been woven with a special technique and that are particularly tear-proof. Grid-like reinforcement threads are integrated into the thin fabric at distances of 5 to 8 millimetres. Benefits of modern Ripstop fabrics are their extremely light structure, low wetness elongation and very high tear resistance.

The most important fiber that is processed into Ripstop fabric is polyamide; the fabric produced with this is called Ripstop-Nylon.

Polyester fabric is also processed into Ripstop fabric. Polyester takes up only little moisture, is highly UV-resistant, maintains its shape even when wet and can be coated very well.

Transparent Mylar-Laminate

Mylar-laminate is a high-quality layered composite that is produced of several layers.

The core layer is made up of a highly resilient fiber fabric. The special benefit of Mylar is a high resilience and extreme form retention. Processing of Mylar film also gives any sail a particularly technical and high-quality look.

FRAME OF SPACE AGE COMPOSITES

The frames of all "HQ Sportkites" are constructed solely of state-of-the-art composites that are used in aviation and aerospace as well.

Carbon Fiber

Carbon fibers are a high-tech material that is particularly suitable for applications where a low weight is needed at a concurrent high stiffness. Carbon fibers are stiffer than steel, lighter than fiberglass and twist less easily. Kites with carbon frames therefore fly particularly precisely.

Fiberglass

The strength properties of fiberglass fibers correspond to those of metals, but at a much lower weight. Fiberglass fibers are also extremely flexible and break-proof. We use fiberglass specifically in the construction of beginners' stunt kites. With their "crumple zone", fiberglass stunt kites will easily survive the feared crashes.

Connection Technology

In the connection technology of "HQ Sportkites", we leave nothing to chance with our specifically constructed high-quality "HQ" connectors. Form and material resist the challenges of any wind, weather and temperature.

A BIT OF LINE SCIENCE

Although the quality of the flight lines essentially influence flight performance and flying fun, quite a number of stunt kites are only equipped with moderate quality lines. "HQ Sportkites", however, contain only braided flight lines of high-quality fibers.

Dyneema (Spectra) lines

Their extremely thin, light-weight fibers with very little stretch make Dyneema the ideal lines for stunt kites. At the same weight, Dyneema fibers are much more tension resilient than steel. The minimum elongation of the material (less than 5%) ensures maximum control of the kite, while the very small line cross-section minimises air resistance. The surface of our Dyneema lines is very smooth, so that they will not block or even "saw through" when turning in. The fiber is extremely resilient to abrasion, moisture, UV radiation and chemicals. Most „HQ Sportkites“ are equipped with hi-tech lines from Liros / Hamburg. Top quality - made in Germany.

Polyester

Polyester fibers are more cost-efficient than Dyneema. For "HQ" beginners' stunt kites in the entrance price ranges, refined, braided polyester lines are used. The natural elasticity of the fibers is drastically reduced by the pre-stretching of the lines. Polyester fibers also permit a small line cross-section with a reduced air resistance. The remaining extension after stretching deflects wind gusts better than Dyneema does.

Twisted or braided lines?

In cheap "no-name" kites, low-quality lines are often used that will twist very quickly. "HQ Sportkites", in contrast, are equipped with high-quality closely braided line sets only to provide a trouble-free handling.

Dancer₂

BEGINNER

The diamond shape stands as a timeless favorite among beginner stunt kites. The Dancer Rainbow II features new, innovative connectors that make it a breeze to expand your kite fleet with stackable kites like the Dancer Rainbow II Expansion Kite (item no. 112339, available separately). This unique feature allows you to effortlessly launch multiple kites in succession, creating a captivating spectacle across a wide range of wind conditions. Whether you're a beginner or a seasoned pilot, the Dancer Rainbow II promises an exhilarating flying experience and promises hours of pure enjoyment. 15-meter tube tail included.

The Dancer Rainbow II Expansion Kite with pre-measured and pre-installed stacking lines is your ticket to effortless stacking and expanding the Dancer Rainbow II (lead kite, item no. 112338). You can seamlessly connect multiple expansion kites together, forming an impressive kite stack that can be flown in a captivating row. Comes without flying lines. User-friendly instructions included.

Built from an almost unbreakable fiberglass frame and durable ripstop polyester, this docile entry level sport kite is extremely robust and fun to fly. Again and again

pilots mention the good-natured and predictable flying characteristics, which make the Calypso II one of the most popular beginner sport kites in the world.

Calypso standoffs now integrate with sail to prevent accidental loss.

QUICK STEP II

BEBOP

Quickstep and Bebop standoffs now integrate with sail to prevent accidental loss.

Manufactured from durable ripstop polyester and almost unbreakable fiberglass rods, Quickstep II is noted primarily for its sturdy design. The setup is simple, the flying properties are extremely docile. Quickstep II can

be flown reliably even by beginners in a wide wind range. The drag forces are moderate, but solid – the flying speed doesn't overpower the pilot. With a little practice, the Quickstep II can master simple tricks.

The BEBOP is an easy to fly stunt kite for pilots 8 years and older. Framed with fiberglass and a strong sail, it excels in low winds and is flexible and durable enough to withstand crashes with ease. By using the same clever

4-point sliding bridle as the Yukon, you can be sure the Bebop will perform well, even in higher winds. With easy control in a wide wind window and no oversteer, the BEBOP is a perfect match for beginner flyers.

ALLROUND

Limbo II is truly a worthy successor to the well-known Limbo – more pull, more precision, sturdier, simple to assemble and the addition of bold graphite fabric accents. Despite the good-natured flight characteristics which make the Limbo II an excellent choice for beginners, this kite offers

exceptional performance in its class – pleasant design, precise and punchy flight, wide wind range. A frame of sturdy fiberglass renders the Limbo II extremely robust. No matter whether the winds are light or strong sea breezes are blowing – Limbo II is great fun even in difficult wind conditions.

The Stinger combines sturdy construction with quality workmanship. Its direct responses through the lines give pilots perfect control over the kite at all times. Nice loops and good precision will quickly lead to successful experiences. Stinger travels the skies in a rather dynamic

way and over a wide wind range. 6 mm fiberglass rods will also survive unintended crashes. Stinger is an excellent choice for beginners and will guarantee exciting flight experiences at an affordable price.

The "Yukon II" is ready to fly in the wake of its legendary predecessor. Faster, more precise and agile than the prior model, with a larger wind range and better response – the Yukon II makes learning to fly a sport kite a fun experience. With its

flexible and robust rods it is perfectly prepared even for hard landings. The "Yukon II" can perform a wide range of basic stunts (Axels, Slides, Pancakes and Backflips) so you'll never get bored.

SALSA 3

JIVE 3

The new Salsa III is superior to its predecessor in every respect – faster, more powerful, more precise and sturdier. With its new sail design Salsa III dances beautifully across the sky. Direct feedback makes flight easier for novices. The frame is incredibly durable

and provides for flight in a wide wind range - with tidy precision and tight loops. It masters even simple standard tricks easily. Let's dance!

Perfectly stable and forgiving for new pilots, the Jive III is a high performance sport kite you will never outgrow. Built with a tough and light weight carbon fiber frame, its wide wind range lets you fly where ever you are from coast to countryside. A Kevlar-reinforced nose and a Velcro spine release is designed to dissipate sail and

frame stress on extreme impacts. The Jive III's bridle is easily adjustable so that as skill level grows the kite can be tuned to be more radical and responsive. It also includes an optional counterweight that lets you change the balance point for advanced tricks.

ALLROUND

ALLROUND

The Trek is a real beginner friendly sport kite. This kite feels at home in almost any type wind and flies with a progressive feel that makes spins and basic tricks easy to master. Its predictability and robust workmanship

make the Trek the ideal learning and leisure kite for the whole family.

The Maestro III may look similar to its predecessor. But it is a completely redesigned sport kite that delivers the latest in trick flying performance. A rapid rotation of the Maestro III's longitudinal axis makes the completion of tricks easy and exceedingly precise. Equipped with a light and rigid frame made of carbon and Dynamic T15, this freestyle machine will allow you to explore all the possibilities of freestyle flight with ease. Mylar panels give the Maestro III added stiffness and a distinguished look. Two removable 15 gram tail

weights aid trick execution at stronger wind speeds. A moderate flying speed and predictable flying character make the Maestro III suitable for all skill levels. The versatility of this high-quality flying machine will never leave pilots bored.

FELLOW

Flying stunt kites is a multi-faceted sport. First popularized in the late 80s and early 90s, team flying, as a demanding discipline of kite sports, is fashionable once again. Two or more skilled pilots flying in disciplined formation will find the perfect companion in the Fellow. With the Fellow, HQ offers a calm and extremely precise kite that flies as if on rails. The Fellow provides plenty of speed control. It flies cleanly through corners and paints entire choreographies in the sky. If you are looking for a kite

with accurate flying abilities or just want to relax, then the Fellow will be the right choice for you. And if you prefer to incorporate slack-line tricks, the Fellow will not disappoint you.

LIGHT WIND

The Cirrus offers features that are otherwise only found in higher price brackets. Endless fun for beginners and experienced pilots is guaranteed with this exciting kite that combines quality with thrilling performance. Equipped with a light and rigid carbon frame, the Cirrus

offers excellent flying characteristics over a very wide wind range from 1-7 Beaufort. The Cirrus flies with a noticeable pull even during low wind conditions. In stronger wind this agile kite zooms through the sky at breath-taking speeds.

Don't let the lack of a breeze spoil your fun. The Flow is an extremely light weight kite built for doldrum days. When there is nothing left for other kites, the Flow still provides the necessary feedback to pull it across the sky. Crafted with lightweight sailcloth and robust 3mm carbon fiber frame, the Flow performs whatever,

wherever, even in difficult urban street settings. Let the Flow expand your kiting possibilities. You never know where the urge to fly may strike.

Light wind is home for the new Shade. Designed for performance flying, the Shade provides optimal feedback to the pilot even with very little wind. Such response makes flying in light breezes much easier. With its eye-catching appearance, a sail made of lightweight spinnaker nylon and feather light carbon fiber tubes, the Shade conjures up amazing maneuvers

in the sky. The Shade allows complex tricks to be performed effortlessly in the hands of a skilled pilot. With this elegant light wind machine, the lack of a breeze is a thing of the past.

Shade
Art. Nr. 117609

Introducing Diva, a remarkable sport kite that dominates the sky with its commanding size and exceptional flight capabilities. Its impressive appearance is perfectly matched by its performance. Diva effortlessly navigates through a wide range of wind conditions with dynamic precision, providing the pilot with consistent and gratifying feedback through the flying lines. Whether executing tight loops, soaring in long straight flights, or performing elegant aerial maneuvers, Diva's size and agility captivate both pilots and onlookers alike. This kite is a versatile all-rounder, offering pilots the thrill of stunt kite flying combined with a

high level of enjoyment. Diva stands out not only for its remarkable performance but also for its aesthetic appeal, ensuring that pilots will be reluctant to stow it away after each flight.

LIGHT WIND

"Stormy Pete" flies like it looks - quick and exciting. High speeds, tight spins and extreme manoeuvres are part of the repertoire. Built with flexible fiberglass rods, sturdy craftsmanship and a simple structure, "Stormy Pete" is ready to take on beginner pilots

and ferocious winds. Its precise control is amazing for a kite of its size and will help build confidence for neophytes at the controls.

Stormy Pete Graphite
Art. Nr. 116000

The Cruiser offers an exceptional introduction into the world of speed kiting. On account of its robust fiberglass rods and its top-quality manufacturing, the Cruiser will survive many crashes without impact on material and function. Take-off is relatively easy and as soon as the Cruiser is being propelled by the wind, the pilots ought to concentrate well. The Cruiser moves across the sky with great precision, both looping and in straight lines, wanting to be challenged. Anyone, who still has doubts,

should have a look at this kite. The acute design of its sail wastes no time in revealing the true character of this kite and those who enjoy battling with the wind, would make precisely the right choice with the Cruiser.

WHIZZ

Whizz is one of the fastest kites in the HQ range with the potential of becoming a cult classic. This kite's potential for fun is incredible. Its unique twin keel, high-end wind range, robust frame and speed in flight make Whizz stand out. Whizz starts flying at wind speeds of 2 Bft! Just watch it go! It stays steady on course in gusty inland winds. Screaming spins occur at speeds of 4 Bft and more. A flexible keel mounting

and cambered leading edge guarantee smooth acceleration for pleasant feedback. Yet Whizz is demanding and always requires your concentration in its quest for constant movement. You simply have to keep an eye on it.

SPEED & POWER - DEMANDING CARBON RANGE

Little Arrow flies fast, really fast. While flying Little Arrow pilots can go to the limits of their response capacity. Despite his incredible maneuverability, Little Arrow flies very precisely. Loops look like a moving circular saw blade and make Little Arrow a challenge for eyes and hands. The start succeeds easily at 2-3 Beaufort, from 4 Beaufort the challenge begins with the pilots' ability

to concentrate. In high winds, this little racer requires strong lines as Little Arrow develops surprising traction for its size. So this kite promises a fast-paced action experience for all pilots who want to push their limits.

Arrow M - high speed combined with manageable power. Pilots seeking these attributes will immediately take the Arrow M into their hearts. Faster than Arrow and Arrow XL, easier to fly than the Whizz, the Arrow M provides impressive precision and a pleasant pull. Tight spins and razor-sharp ground passes provide action and

endless fun while flying. A sail made of bright green and graphite patterned polyester fabric with a sturdy carbon frame enable the Arrow M to fly in a wide wind range.

Arrow is an extremely dynamic “real racer” that combines power and speed in an incredible manner to provide challenging flight experiences. Astonishingly tight wing tip loops and high speeds, even in lower wind conditions, guarantee sporty and endless fun. The Arrow takes off easily and runs on rails through the air, cutting cleanly through gusty winds and staying on course – those are properties not characteristic for kites in this

class. With medium to high wind conditions, pilots must be ready for a challenge. In addition, the appealing carbon design and broad, crescent-shape appearance help makes the Arrow a unique kite.

The Arrow XL leaves no doubt about its purpose - pure power and a high degree of speed. Just like its smaller brother, the Arrow XL pulls dynamically and quickly on precise straights and extreme loops through the wind window. Even gusty winds do not strain the Arrow XL a

bit. Flying the Arrow XL is a very special experience and guarantees a fun workout. The size, shape and high-tech look underline the character of this kite, which belongs to experienced hands and requires the pilot’s respect.

**EASY
QUAD**

meteor

QUAD

Easy Quad is the affordable entry into the world of quad line flying. Nevertheless, the Easy Quad stands for „pure fun“ and provides a variety of thrilling flying experiences. Forward and backward flights, fast loops, abrupt stops and radical changes of direction -

Easy Quad makes it possible at a high level of controllability. Its almost unique shape, cool design and high crash stability give the Easy Quad a special charisma.

Flying clean and straight lines as if on rails, amazing forward and reverse flights, hovers, breathtaking propeller spins - all this is part of the flight repertoire of the Meteor. The special feature of this quad-line kite, however, is the calm and controllability with which it „paints“ stunning flying figures in the sky. The extraordinary flying performances of quad-line kites attract more and more people. Beginners who want to learn more about the possibilities of quad-line kites, will find a very versatile companion

with an attractive design in the Meteor - and all at a very attractive price. Even experts will appreciate the flying potential and controllability of this kite.

Multi Kite

A unique, crisscrossing spar configuration creates a leading edge that is extremely sturdy and absorbs impacts, making the Mojo perfect for first time quad-line flyers. The Mojo offers full quad-line control and is capable of forward and reverse movement, instantaneous stops, hovers and propeller spins.

Removable wind brakes help control speed and provide greater ease of control when learning. Detaching the wind brakes allows the Mojo to turn and spin extremely fast for pilots that have a good mind to give something new a try.

The frameless Multi-Kite combines all the good things about kiting. The contemplative and relaxing side of single line kite flying and the sporty side of stunt kite flying. With this kite, both become so easy that we recommend the Multi-Kite for kids ages 10+. Flown as a single line kite, it develops light but noticeable pull. The long tube tail helps to stabilize its flying

characteristics. Simply take out part of the bridle line, attach flying straps and the Multi-Kite becomes a stunt kite. Perfect for beginners, the kite flies slowly which helps the first time flyer to perform loops, turns and dives with ease. The attached tube tail provides a colorful trail that follows the kites every move.

QUAD & MULTI KITE

QUAD

The Verve is HQ's high-performance quad-line sport kite. Prepare to be mesmerized by its flight acrobatics as it effortlessly executes forward and backward maneuvers, glides sideways, hovers gracefully, performs dynamic propeller spins and halts abruptly on a dime - all within the Verve's repertoire.

Crafted with a robust frame composed of wrapped graphite Dynamic rods and a distinctively lightweight ripstop polyester sail, this kite maintains its shape thanks to its special bridle design. This exceptional combination elevates the Verve's flight characteristics to perfection. Launching the Verve is a breeze and

it exhibits remarkable precision even in light winds, offering unparalleled controllability.

With its predictability, the Verve ensures maximum enjoyment for professionals and stands as an excellent choice for newcomers in the ever-expanding world of quad-line kites. The Verve comes „Ready to Fly,“ complete with high-quality Dyneema lines and handles, all at an exceptionally attractive price point.

NEW!

Verve Aqua
Art. Nr. 119393

Unlike a conventional ram-air foil kite, the Kick 180 has been engineered without open cells. This robustly constructed 4-line single skin kite develops surprising, but always pleasant pulling forces. Due to its remarkably low weight, the Kick 180 performs in low wind speeds. With 4-line control, the Kick 180 is easy to launch, land and reverse launch, making it easy-to-fly and ideal for beginners. Designed and engineered with a minimal number of bridle lines, the setup and handling of this

flexible wing is very user-friendly. The fear of a damaging crash is unfounded since the Kick 180 is virtually indestructible thanks to the single skin design – shattered cells belong to the past.

HQ SYMPHONY - WORLDWIDE "TOP OF THE LINE"

For more than 20 years, the name "HQ Symphony" is a synonym for most successful foil kites worldwide. From generation to generation, all Symphonys have been adapted to the latest technological standards. With their current lines all "HQ Symphonys" belong to the "top of the line" foil kites in their classes. All "HQ Symphonys" guarantee first-class components, best workmanship and extreme durability. "HQ Symphony" offers a variety of lines for different target groups:

Symphony Beach

- Designed to match the needs of beginners, provides excellent value for the money
- Symphony Beach belongs to the most successful and best-selling foil kites worldwide
- Developed with paragliding know-how
- Highly user-friendly - no foil kite in this class has fewer bridle attachment points
- Provides excellent flight performance and decent accessories
- Equipped with wrist straps or 2-line controlbar
- Compact carrying case - ideal for traveling and holidays

Symphony Pro

- The Symphony line for demanding pilots - with uncompromising components and accessories
- Developed with paragliding know-how
- Highly user-friendly - no foil kite in this class has fewer bridle attachment points
- Provides amazing flight performance and uncompromising accessories
- 2021 update for larger Symphony Pros (2.2 & 2.5): Convert to Quad!
- Sporty designs - stylish carrying cases
- Compact carrying case - ideal for traveling and holidays

Symphony Speed II

- The Symphony line for all pilots who want to push their limits
- Higher aspect ratio enables these kites to fly much faster than regular Symphonys
- Developed with paragliding know-how
- Highly user-friendly - with uncompromising components and accessories
- Provides amazing flight performance and breathtaking speeds
- Sporty designs - stylish carrying cases
- Compact carrying cases - ideal for travelling and holidays
- Detailed instruction manual (Sportkite Guide)

UPDATE

Additional features of the 2021 Symphony Pro series:

- Convert to Quad – Our larger sized Symphony Pros (2.2 & 2.5) now have connecting points on the trailing edge so they can be easily converted into a quad line kite. Add a brake line bridle (sold separately) and enjoy true quad effect with reverse flying and active braking. Additional Quad Handles and flying lines are also sold separately.
- All Symphony Pro sizes come with new and improved kite bags.

Fun for all skill levels looking for speed and power, the revised Symphony Pro is one of our favorite kites. This ram-air, frameless foil design feels solid in the air and doesn't fold on the edge of the wind. Sewn Dyneema bridles provide low-drag and strength for performance that is fast, stable and smooth. The larger sizes have impressive pull, so be prepared to lean back and hold on. Compact carrying cases make it easy to take on your next adventure.

Trick ▶▶▶▶▶

The Speed series lives up to its name with blazing fast speed and smooth control. A higher aspect ratio enables these kites to fly much faster than regular Symphonys for more thrilling power. Carefully engineered with sewn Dyneema bridles for lower parasitic drag and built with the same meticulous high quality standards as our top-end Powerkites. The Symphony Speed II packs small for everyday travel, because you never know when the wind is going to blow.

JUMP – the name of this dual-line foil says it all. When the JUMP races towards zenith, it's high aspect profile generates a lot of lift. This makes flying the JUMP a fun and physical challenge. Despite its sportiness, the JUMP is always manageable and never gets unstable. The first-class workmanship made of high-quality material and the elegantly designed carrying case make the JUMP a fun kite that can travel with you anywhere.

H Q 4 K I T E S

BORN IN THE WIND

Here on the shores of the North Sea something is in the air. It strikes you with full force, a feeling of something calling, an invitation from the wind beckons you onward with a passion to strike out and take it all by storm – the beach and the sky.

Sandy dunes, wind-swept beaches or endless blankets of virgin snow - these terrains are now your playground to become one with nature's forces.

But this is only possible if you have reliable, robust sports gear that is reassuring and feels like a natural extension of your own body. We have developed and made that perfect kite equipment since 1997.

Deeply immersed in all the many facets of wind power and passionate about wind sports, we at HQ4 understand what it takes to create the perfect kite.

We do not settle for the generic status quo. We understand that complexity does not equal superiority – and that there is Elegance in Simplicity. Pinnacles of beauty, ingenuity and performance most often are the result of less of something – not more of it.

Here at HQ4, we are obsessed with making fun kites for people who are new to the sport or looking for something new to try. HQ4 has everything you need to get started, improve snowkiting, kite buggying & landboarding. We want everyone to be able to share our obsession with kite sports. Your demands are our challenges. At HQ4 we design kites for you.

RUSH PRO SCHOOL

300

Art. Nr. 118048

You want to be well-prepared for kitesurfing, snow-kiting as well as landboarding? And you are looking for a trainer kite, but would also like the challenging characteristics of a real depower kite? With the Rush Pro School 300 we have developed the perfect partner for you – robust, safe and with very easy handling. The Rush Pro School 300 flies just like a big kite, without asking too much of you. Depending on the wind conditions, your kite sessions can be anything between very comfortable and challenging. The depower of the Rush Pro School 300 allows you to shift up a gear whenever you feel like it. Power and speed to the max, but always with full control – flying the Rush Pro School 300 is just simply fun. And it helps you to make fast progress.

_TRAINER KITE HYDRA

420
Art. Nr. 117579

350
Art. Nr. 117577

300
Art. Nr. 117575

Crowded beaches and no space for kiting?

Launch the Hydra and head off into the water!

The Hydra is a unique trainer kite designed to re-launch in the water.

The revolutionary closed-cell technology makes relaunching and landing on the water safe and easy.

A one-way valve system and a watertight zipper effectively prevent water from entering the kite.

The Hydra works equality well on land and generates enough power to pull you through the water during your first body drags. The 3rd line safety system quickly lands the kite if you ever feel overpowered, so you can focus on learning techniques and new experiences.

FACTS //

- ▶ Reduced bridling for low drag performance
- ▶ Cross-bracing rib structure increases durability
- ▶ Air intake system for quick self-inflation
- ▶ Improved aerodynamics
- ▶ Sizes up to 420 cm wingspan

_HANDLE KITE ALPHA

2.5
Art. Nr. 118103

3.5
Art. Nr. 118105

1.5
Art. Nr. 118101

Are you looking for an uncomplicated beginner traction kite? We have developed the Alpha just for you. With its robust and forgivingly shaped design we have laid the foundation for maximum safety and control, while maintaining very good power development. All materials were chosen for the tough conditions that a fun beginner kite has to withstand. With all sizes perfectly geared towards a large range of wind conditions.

When you hold the Alpha lines in your hands, you feel immediately at home. In strong winds the kite will challenge you, but the quad line steering always keeps you in direct control. No matter how old you are, the Alpha will always be a fun companion.

FACTS //

- ▶ Perfect for beginners
- ▶ Robust materials and workmanship
- ▶ High quality Dyneema flying lines
- ▶ Comprehensive accessories (quad handles, dyneema line set, kite killer safety system, ground stake)

3.0
Art. Nr. 118213

4.0
Art. Nr. 118215

2.0
Art. Nr. 118211

Are you looking for the perfect kite to help you take your next step in power kiting? A kite for the next level? Then the Beamer is the best choice for you – a kite that has been steadily perfected from one generation to the next and is now up for anything.

The Beamer's quad-line handles offer direct and precise control to power you across land or snow.

The Beamer provides simple access to power kiting for beginners and provides skilled pilots with greater maneuverability, thanks to incorporated paragliding design know-how.

With the Beamer you decide if you want to be radical and fast, or prefer to move with more ease. One thing is for sure, the Beamer is extremely versatile.

FACTS //

- ▶ Extremely stable in turbulent wind conditions
- ▶ Numerous accessories (quad handles, Dyneema lines, kite killers,...)
- ▶ Break line input offers extra power
- ▶ Reduced bridle for minimum drag
- ▶ Large wind range

_DEPOWER KITE
APEX

Are you looking for a kite you can trust 100%? One that won't let you down even in extreme backcountry situations? One that lets you safely scale lofty heights? Especially for you, we have developed the Apex to be one of the best companions you can find for exploring the backcountry. Maximum control, great stability and ample depower performance make this kite your perfect partner while you steadily improve your personal best. No need to fear making mistakes. The Apex is quite forgiving and makes it extremely easy for you to get started with kiting.

FACTS //////////////////////////////////////

- ▶ Excellent control in extreme situations
- ▶ Very stable, great depower performance
- ▶ Impressing power always on hand
- ▶ Extremely easy to fly

_ONE BAR FITS ALL ONE BAR 2.2

Adjustable Relaunch Balls

For easy and safe relaunch.

Covered Backlines

To protect the lines from damage and avoid tangles after hard crashes.

More Depower

The new bar setup results in a wider depower range that can be smoothly trimmed with our adjustable Clamcleat.

Soft Barends with integrated Line Keepers

For more comfort and secured lines when winded up.

New Swivel

The new swivel positioned above the chicken loop makes for a far cleaner bar design. The flying lines can now be untwisted by hand at any time.

The new One Bar 2.2 is the result of creative thinking by our development team and valuable input from our customers – many small changes mean a considerable step forward. This latest version of the One Bar is even lighter, more versatile and more straightforward than ever before.

The new bar design means that you can fly all

our kites with the same bar. The new One Bar 2.2 is available in lengths of 49 and 55 cm, and each comes with 24 m pre-stretched Dyneema lines. In combination with our optionally available safety leash, the new One bar 2.2 is the perfect cockpit for your kite.

Adjustable Stopperball

The adjustable stopper ball helps to limit the bar range after the safety was activated. It is optimally pre-trimmed for use with larger kites.

Light-weight Line Splitter

The light-weight line splitter significantly reduces the weight in the center of the bar, resulting in less movement especially in light-wind conditions. The low-friction polish of the splitter makes a pulley unnecessary.

Low-friction Stainless Steel Ring

Low-friction stainless steel ring for better guidance of the safety line.

Dyneema Lines

High quality pre-stretched Dyneema lines (275 / 300 kp, 4 x 24 m) with almost no elongation for a super direct feel. Sleeved and stitched line ends.

49 cm
Art. Nr. 120558

55 cm
Art. Nr. 120559

HQ4 2-Line Control Bar 50 cm
Art. Nr. 120529

Control Bar for Rush and smaller 2-line fun kites (e.g. Symphony).

HQ4 Quad Handles XL "Coloured"
Art. Nr. 120533

- ▶ Made of heavy duty aluminium
- ▶ EVA coating makes the handles easy to hold and they won't get slippery
- ▶ 37 cm

HQ4 3-Line Control Bar 50 cm
Art. Nr. 120528

Control Bar for 3-line kites (e.g. Rush Pro or Hydra).

HQ4 Kite Killer
Art. Nr. 120538

HQ4 ACCESSORIES

HQ4 Safety System (Hand Leash)
Art. Nr. 120527

This safety system for 2-line control bars (e.g. Fluxx) makes it possible to release the control bar in an emergency without losing the kite.

HQ4 ACCESSORIES

HQ4 Ground Stake
Art. Nr. 120539

Ground stake for securing landed kites. In signal colour.

**HQ4 One Bar 2.0/2.1/2.2
Chicken Loop Ultra**
Art. Nr. 1205510

Newly developed chickenloop - releases fast and accurate, super easy assembly.

**HQ4 Harness Line Fix with
Quick Release**
Art. Nr. 119421

HQ4 Leashline
Art. Nr. 119423

This new HQ4 leash line sets new standards in kite safety. This is the first leash line to offer an individually adjustable release force that can be increased or decreased depending on the demands of the rider. Due to a completely transparent trigger mechanism, riders can rest assured that the system is set properly.

HQ4 Strop Line
Art. Nr. 12053301

The HQ4 Strop Line features spliced loop ends that can be attached to any regular pair of quad handles. Heavy duty coating to protect the Dyneema line from wear. Easy and quick to attach or release. Length: 55 cm.

Surf Lock
Art. Nr. 119415

Never be locked out again! Surf Lock is the ultimate solution to outdoor key storage during outdoor activities. Surf Lock can be conveniently placed on your vehicle, outside of your home or business, for easy access without fear of theft! With its durable construction, you can be sure that your valuables are protected. Just enter your 4-digit combination, leave your keys and your worries behind!

HQ Kite Bag

140 cm

Grips with line

Art. Nr. 175900

15 kp, 50 m, D-handle with line and „EasyClip“ - easy „no knot“ line attachment.

Spool with line

Art. Nr. 175902

17 kp, 40 m, spool with line and „EasyClip“ - easy „no knot“ line attachment.

Winder Sets

Their extremely thin, light-weight fibres with very little stretch make Dyneema the ideal lines for stunt kites. The minimum elongation of the material (less than 5%) ensures maximum control of the kite. Dyneema is extremely resilient to abrasion, moisture, UV radiation and chemicals. Most "HQ Sportkites" are equipped with hi-tech Dyneema lines from Liros / Hamburg. Top quality - made in Germany.

HQ Winder Set Dyneema

Hi-tech Dyneema lines from Liros. Top quality - made in Germany.

"Victorian Style" Windspinners

The Victorian Era (1837-1901) was a period of transformation. In the decorative arts, this time did not produce merely one style, it produced many. Historical revivals, an anti-industrial return to nature, futurism, and Oriental exoticism all coexisted in the public imagination, and were often found in decorative combinations. Our Victorian style collection of wind spinners are reminders of this vibrant era and will add a splash of warm and inviting flair to your home. All items of this range captivate with a charming blend of style and colour.

Spin Critters

Decorate your lawn and garden with our amazing critter selection. These winged sensations are designed to spin easy even in the lightest of breezes. Our economical Spin Critters are nice accents to the larger Paradise Critters. Everyone will be captivated by the beauty of these little creatures. Our fantastic selection of high-quality Paradise Critters (see page 92) will increase the beauty of your personal surroundings and include a sturdy ground stake for easy installation. Sit back, relax and enjoy their mesmerizing beauty.

Ocean Mobiles

Take the ocean to your home with our colourful Ocean Mobiles. Moving gracefully in the lightest air movement, these mobiles replicate the swimming motion of the sea creatures they mimic. Ocean Mobiles come completely assembled and ready to hang in your home or on your porch. They are ideal for children's rooms, living rooms, offices, patios, or any space you want to brighten with these impressive sea creatures. All Ocean Mobiles are made of tear-resistant and weather-proof ripstop polyester and come in an attractive packaging with interesting information about each individual fish.

Twist

All of our colourful Twists spin and sway with the smallest breeze. Add one or several to create an enchanting garden of whimsy and fascination or delight a child by hanging them from a playroom ceiling.
